

AI Producer Release Notes

2025.1.1

Features and Improvements

Q&A QR Code in Confirmation Email

If Q&A is enabled, the AI Producer confirmation email will now include a QR code linking to the Q&A attendee page. Please note that, depending on your email client (e.g., Outlook), you may need to mark the sender as trusted in order for the image to appear correctly.

Q&A QR Code Shown in Meeting

If Q&A is enabled, the AI Producer bot will now display a QR code linking to the Q&A attendee page during prepare mode/pre-bumper, as well as when the bot is not playing any other video. To show the QR code in a broadcast destination, a producer needs to actively select it in the AI Producer Control Room or Control Panel, as before.

“Fixed Layout” Renamed to “Manual Mode”

To improve clarity, the format previously called *Fixed Layout* has been renamed to Manual Mode. The functionality and behavior of the format remain unchanged.

Support for Stereo Audio in Meetings and Productions

AI Producer now supports stereo audio playback both in the production meeting and in the broadcast destinations.

In addition to these improvements, some minor enhancements have been made and a few bugs have been fixed.

Please contact us if you are interested in a demo of AI Producer, including our upcoming features.
